

SÖLL - A name that guarantees quality

Christian Dalloz Holding Deutschland GmbH & Co. KG offers you - the customer - an extensive and highly specialised range of products. This is backed up not only by our company concept but also by our highly motivated staff, the most modern technology and the partnership with our suppliers and customers.

The Company Group Christian Dalloz Holding Deutschland GmbH & Co. KG formerly Söll GmbH is a company rich in tradition. Founded in 1921 by Karl Söll as an industrial forge, the company quickly became famous for its quality and productivity. The foundation for our modern hot-dip galvanising plant was laid only a few years after the company was established. Since 1969 we have been developing and producing system components for fall protection systems and today Söll stands at the forefront as a manufacturer of fixed safety ladders and personal protective equipment to guard against falls.

Our success is the quality of our products but also the permanent development of intelligent solutions for the safety of your workers. Our trademarks are precision and reliability in co-operating with our customers. We guarantee the highest quality using the most modern plant technology and our own quality control system.

Safety in Action. Why not talk to us - we look forward to helping you!
